

Choose the 3 biggest impacts that climate change will have on your community in the next 20 years:

- 1. Rising economic and social costs of adaptation
- 2. Destruction of local ecosystems and infrastructure (droughts, hurricanes, fires, floods, rising sea levels)
- 3. Deforestation
- 4. National landmarks at risk
- 5. Social instability
- 6. Contamination and security of water supplies
- 7. Risks posed to employer's long-term viability
- 8. Disruption to food security
- 9. Extinction of species
- 10. Massive migrations
